

The Chemistry of Cement and Concrete

A technical seminar and celebratory dinner to mark the 5th edition of FM Lea's classic work

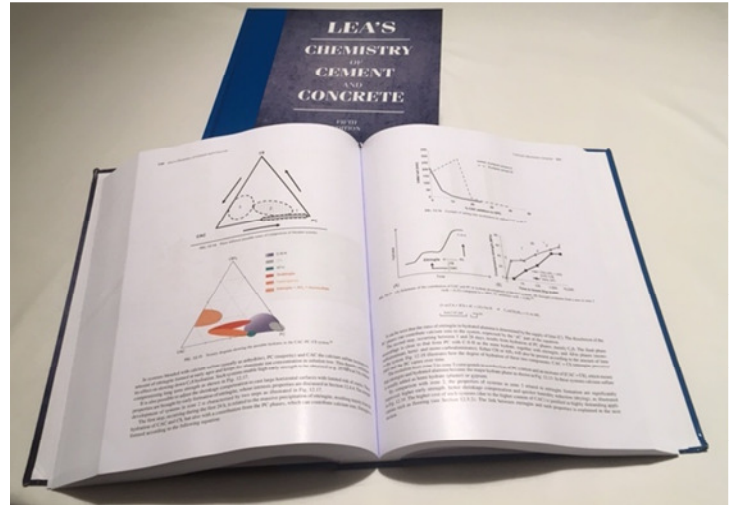

21st May 2019

2pm, followed by dinner at 7pm

at **University College London**

Chadwick Building, Gower St., London WC1E 6BT

First published in 1935, this new edition of Lea's Chemistry of Cement and Concrete has been revised by Prof Peter Hewlett and Dr Martin Liska, with a distinguished panel of specialist contributors. It was published by Elsevier (Butterworth-Heinemann) in March.

As both editors and many of the chapter authors are members of the Institute of Concrete Technology, the ICT is pleased to mark the completion of this significant undertaking with a technical seminar, to explore the subject matter, and an evening dinner to celebrate the book's publication.

A programme of presentations and discussion is expected to include the following:

A History of Calcareous Cements	Edwin Trout, <i>The Concrete Society</i>
Components in Portland Cement Clinker	Duncan Herfort, <i>Aalborg Portland</i>
Physicochemical and Mechanical Properties	Dr Kevin Paine, <i>University of Bath</i>
Calcium Aluminate Cements	Prof Karen Scrivener, <i>EPFL</i>
Special Cements	Dr Martin Liska, <i>Sika Ltd</i>
Cement and Concrete Admixtures	Prof Peter Hewlett, <i>DB Group (Holdings) & University of Dundee</i>
Concrete Aggregates	Dr Ian Sims, <i>RSK Environmental</i>
Geopolymers and Alkali-Activated Materials	Prof John Provis, <i>University of Sheffield</i>

Meet the authors and celebrate the book's launch with a glass of champagne as the seminar closes, along with a book signing and photo opportunity. Dinner follows at another venue close by.

Tickets: £60 + VAT

OR seminar only £30 / dinner only £40 + VAT

30% off the book's purchase price

available to attendees, and a free copy raffled on the day
(retails at £200)
